DBS Filtering Rules

Convictions

- A conviction will be filtered from a criminal record certificate only if:
- 11 years have elapsed since the date of conviction (5½ years if under 18 when convicted);
- it did not result in a custodial (or suspended) sentence;
- It is not on the DBS list of specified offences that will never be filtered.

Cautions

- A caution for adults will be filtered after 6 years have elapsed since the date of the caution and only if it
 does not appear on the DBS list of specified offences that will never be filtered.
- Youth cautions are not disclosed on DBS certificates.

The Update Service – supporting your safeguarding measures

WHEN to apply:

Individuals must subscribe to the update service at the time they are applying or within 28 days of receiving their certificate.

WHAT will be updated:

The update service will check for updates against PNC information weekly, barred lists weekly and intelligence every 9 months.

COST:

There is an annual subscription fee – currently £13 – payable by the individual

Checking the status of a certificate is free

CHECKING:

You <u>must</u> have the individuals consent to check the update service.

The service will not proactively tell you if something has changed – regular checking is essential.

The Update Service – status checks

You will need

- DBS certificate number
- Current surname of the DBS certificate holder, as specified on their DBS certificate
- Date of birth of the DBS certificate holder, as recorded on the DBS certificate
- Consent of the individual being checked

Lots of status checks to make?

 The DBS has developed a Multiple Status Check facility which can be accessed via a web service. The Multiple Status Check facility will enable organisations to make an almost unlimited number of Status Checks simultaneously

The Update Service – status check information

Those making the check will be told:

- No new information exists nothing has changed since the certificate was issued
- If the original certificate contained 'no relevant information' and no new information exists
- New information exists you need to get a new certificate to see what has changed
- There is no record of the certificate in the service —this could be because details were entered incorrectly, the certificate has been withdrawn or superseded by a new certificate or the entire subscription is no longer active

You will not be told when something is no longer disclosable:

- Where a certificate discloses an offence which would now be filtered this will show as no change.
 The individual must apply for and add a new certificate to the Update Service
- Where a certificate contains information that is no longer disclosable for other reasons it will show as no change. The individual must apply for and add a new certificate to the Update Service

The Update Service

Benefits:

- Re-check when you need to with the individual's consent
- Ability to carry out large number of checks at the same time
- Faster results you will know instantly if there is no change or if a new certificate is needed
- Enhances your safeguarding processes and may help reduce risks
- Saves time and reduces cost

Things to remember:

- You must see the original certificate at least once so that you can be satisfied that you have made a fully informed decision
- You must do the check DBS will not push out information on changes
- You can set up bulk checking to save time
- Subscribers are reminded by DBS to renew their subscription, you may want to check they have

The Update Service and Manual Certificates

When a certificate cannot be produced by the DBS Disclosure system it is referred to as a 'manual certificate' and cannot be added to the Update Service

- The new rules for filtering mean we have to produce a small number certificates manually because of the way we now have to consider and remove individual convictions
- This means that a proportion of certificates that we issue from 28 November will not be able to be issued in the usual way and a manual certificate will be issued
- The Update Service is not able to accept manual certificates
- Our data suggests that one of the groups who may be affected by this are those applying for Taxi
 and PHV licences
- We are actively working on a solution to remove the need for manual certificates in relation to filtering and are also considering how we can support you in the interim period. We would welcome your thoughts and feedback on this
